## **NEW PRODUCT INFORMATION** **“MAN-MADE LEATHERS”**

‘Man Made’ leathers are the ideal product for anyone who likes the look of leather but would not consider buying any kind of animal skin for ethical reasons. They have a lot of the practical advantages of leather, although not so hard wearing, but they resist scratches and scuffs much better than leather. Another advantage over leather is that these materials ‘breathe’ and cushions can be covered both sides, unlike leather cushions which need a ‘breather’ panel. We offer 4 or 5 alternatives in man made leather, the best of which are as follows:

- ▶ **BISON:** This has a heavy grain similar to Buffalo skin as the name would imply. It is an excellent imitation of the printed grain hides used in large scale upholstery production.
- ▶ **PEGASO:** This has a finer grain and smoother finish. The collection contains a good choice of primary and pastel colours, as well as browns, creams and black.
- ▶ **SAN REMO:** Mainly browns, blacks, creams and neutrals. This has a more distressed or semi antique look.
- ▶ **MONTANA:** Heavily worn leather look.
- ▶ **SAN DIEGO:** 8 plain colours.
- ▶ **RANCHO:** Distressed effect with heavy grain.

All the above have a polyurethane surface which is scratch resistant and easily cleaned. All the above recommended for heavy domestic and commercial use.

### **PRICE GUIDE:**

|                     |   |           |
|---------------------|---|-----------|
